

Digi Data eXchange Conversion

Convert and transform rights data from spreadsheets and licenses into machine searchable rights database!

Avoid manual data entry with Digi-EXpress® automated data conversions... data validation... and metadata re-mapping into new formats... at lower cost!

- **Paper Documents...** We scan, upload, decode and review/correct paper documents
- **Spreadsheets Files...** We automatically convert and transform your legacy data from Excel, XML and Merge files into useful metadata formats for your new systems
- **DDX Data Mapping and Validation...** We programmatically map, correct and validate data using transformation algorithms... and flag exceptions for manual overrides
- **Metadata Coding...** We can convert "text memo fields" into searchable metadata
- **On-line Respository...** We can provide web-based access for instant search & retrieval

Combining Real-World Rights Experience with Automation Technology...

Digi-Rights® Professional Researchers and Advisors review and analyze legacy rights data exceptions for correct mapping

Project Management
Each project is assigned a project manager to ensure on-time performance within budget

DDX® Data Mapping
Digi Data eXchange a patent-pending process to automatically map your legacy spreadsheet formats into a searchable database repository

Document Management
Paper documents are scanned, decoded, corrected and uploaded into a search database repository

Data eXchange
Data is reformatted for use in your legacy Rights Management System or Digi-EXpress® for automated processing
