Toronto, ON, Canada and Bloomfield Hills, MI USA – May 11, 2016 – Digi-Rights, creators of CopyrightsNow™, an innovative app that simplifies the application for U.S. copyright protection for authors and publishers, has teamed up with Rakuten Kobo to offer CopyrightsNow™ through the self-publishing portal: <https://www.kobo.com/writinglife>. Availability of CopyrightsNow™ makes it simple for authors to register copyrights to protect their creative work.

“Copyright protection enables our authors and publishers to protect and enforce their rights from piracy and illegal copying,” said Jodi White, Operations Manager, Kobo Writing Life.

“We are always looking for ways to bring added value to our community of authors, and we’re excited to be partnering with Digi-Rights to launch the CopyrightsNow™ App. We’re impressed by its ability to simplify application for federal copyright protection—and this, within minutes—eliminating lengthy forms and complex procedures. This service offers an important protection to authors and publishers.”

“We are pleased to form a partnership with Kobo to offer their self-published authors and publishers this mobile tool,” said Dick Stahl, Managing Director of Digi-Rights® Direct LLC. “CopyrightsNow™ enables authors and creators to lock-in copyright protection for life plus 70 years without the paperwork and complexities.”

Copyright is a form of Intellectual Property, along with trademarks and patents that encourages the development of culture, science and innovation, while providing a financial benefit to copyright holders for their works. Under U.S. copyright law, authors must register copyrights within 3-months of publication and before any infringement occurs to preserve their rights to claim up to \$150,000 in statutory damages plus attorney fees in enforcing their copyrights. The CopyrightsNow™ App enables authors and publishers to manage their copyright application, from their iPad, iPhone and Android device with the speed and security of a cloud service.

CopyrightsNow™ can be ordered [here](#) and the App downloaded from the AppStore or Google Play
